

SUPPORTED LAW THAT GUARANTEES PUBLIC CONSTRUCTION JOBS FOR LOCAL WORKERS

HELPED CREATE QUALITY JOBS THROUGH THE CONSTRUCTION WORKS OF WV PROGRAM

KNOWS BUILDING THE TrAIL LINE IS THE BEST WAY TO ENSURE RELIABLE POWER FOR OUR REGION'S ECONOMY

TrAILBLAZERS LIKE ROY SMITH, SECRETARY-TREASURER OF THE WEST VIRGINIA STATE BUILDING AND CONSTRUCTION TRADES COUNCIL, AGREE THAT BUILDING THE NEW TrAIL LINE IS THE RIGHT THING TO DO.

Our country's top energy experts have called for new transmission lines to be built to prevent looming power problems. The **U.S. Department of Energy**, the **North American Electric Reliability Corporation** and **PJM Interconnection**, the organization responsible for ensuring our region's power remains reliable, all agree something must be done now.

Access to affordable, reliable power creates jobs and opportunity. But if the Trans-Allegheny Interstate Line (TrAIL) is not built, our area could suffer significant power outages and blackouts by 2011.

We support energy conservation. We're working to help consumers become more energy efficient. But conservation and efficiency programs alone are not enough to meet the challenges we face. We need the new TrAIL line to ensure reliable power.
